### **DETAILED ACTION**

Claims 1-6 are currently pending.

#### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-6 are rejected under 35 U.S.C. 101 because the claimed invention lacks patentable utility for the reasons set forth in Paper No. 2.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-6 are also rejected under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by either a substantial asserted utility or a well established utility for the reasons set forth in Paper No. 2, one skilled in the art clearly would not know how to use the claimed invention.

#### ***Response to Arguments***

Applicant's arguments filed March 26, 2002 (Paper No. 4) have been fully considered but they are not persuasive. Applicant argues that the 35 U.S.C. 101 and 112, first paragraph, rejections are not proper because the compounds can be used to produce other chemical compounds of known usefulness. Applicant asserts that the compounds as instantly claimed can be used as starting materials or intermediates in the synthesis of the compound of Formula I of EP 0618926 B1 which is useful as an

inhibitor of thrombin. Applicant further argues that the 5-methylproline methyl ester obtained in the reference example of the present invention (page 41-42) can be converted into 5-methylproline which could be used to synthesize the compound of example 79 and 80 on page 43 of EP 0618926. However, this argument is not found persuasive because neither the current specification nor EP 0618926 disclose, nor would it be obvious, how to synthesize the compounds of examples 79 and 80 from the 5-methylproline methyl ester. Therefore, the compounds of formula I, from the present invention, still lack utility because it is not shown that the compounds as instantly claimed are useful as intermediates for the production of compounds of known usefulness. Furthermore, even if EP 0618926 had established utility for the specific compound of formula I, which synthesizes 5 methylproline methyl ester, it would not have established utility for all the compounds of formula I as instantly claimed. Therefore, the 35 U.S.C. 101 and 112 rejections are maintained.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
